

1.需請老師補做

(1) calibration_metrics_ **internal_hybridxgbrf**_with_ci (之前老師已有提供external)

(2) risk_decile_calibration_ **internal_hybridxgbrf** (之前老師已有提供external)

2.請老師再幫我們加跑這個表 (採用Development cohort即可)

ALL Feature Missing Percent (Overall missing percent) = 原始資料的 所有預測變數 (All features) 的 **平均缺失率**

Variable	N facilities	N residents	ALL Feature Missing Percent (Overall missing percent)	ALL Feature Missing Percent/ Dead cohort	ALL Feature Missing Percent/ Alive cohort	Death rate
facility_size <50						
facility_size 50-150						
facility_size >150						
Institutional regions_North						
Institutional regions_Central						
Institutional regions_South						
Institutional regions_East						

*** 然後我們需要一個 **卡方檢定**: **機構ID** X **Overall missing percent** (ALL feature的平均缺失率)

老師我們的ALL Feature 是不是下面這些？

3. 老師, missingness_indicator_key_features_regression 這個表 想要增加 意識總分Max_missing 這一項, 然後有沒有辦法有呈現P值?
